

We have had a Four Seasons sunroom for several years. Living in South Texas, we haven't enjoyed the extra living space as much as we planned due to the extreme heat and drought. Finally, we did some research and found that Thermal Designs Inc. in Boulder, Co. made blinds for this type of sunroom. After talking with Isabel and getting our measurements down, along with making the final decision on color, fabric, insulation choice, motorized overhead, etc., we ordered the blinds and tried to wait "patiently"!

Our blinds arrived in good order and at the time promised. They are extremely well made, the fabric is beautiful and everything is first-class! A very detailed instruction manual was included and the installation went well.

The sunroom is now a total pleasure to use and the air conditioning unit is now able to keep the room cool and comfortable.

THANKS Isabel and Thermal Designs for a job well done.
